Restricted Chemicals List

This requirement applies to all SRG Global facilities worldwide. SRG Global will NOT accept the below listed chemicals at or above the concentrations indicated.

Ammonia Solution - 20%

Chlorinated Solvents (including Trichloroethylene and Chloroform) at any concentration or any quantity without the prior approval of the EHS Director.

Hydrochloric Acid – 36%

Hydrogen Peroxide – 34%

Nitric Acid- 67%

Anhydrous Ammonia – No more than 10,000 lbs on site

Formaldehyde – No more than 15,000 lbs on site (only consider the amount of formaldehyde in the solution)

Propane – Less than 60,000 lbs on sites

Use of ethylene glycol is strongly discouraged.
